

## Energy Engineer / Commissioning Engineer

Atlanta, GA

Experience: 10+ years

Our client is a national leader in high-performance building consultation and architecture engaged in sustainable design practices as well as International building consulting. This progressive firm provides LEED consulting, commissioning of building systems, energy modeling, and daylighting studies.

We are seeking an Energy Engineer / Commissioning Engineer to lead an engineering team. Ideal candidates will have:

- Mechanical Engineering PE license
- Experience with energy audits and/or commissioning
- CEM, CEA, CBCP, or CCP certification a plus
- Project experience with federal government facilities and/or laboratories
- LEED accreditation a plus

We are seeking candidates currently living in GA with ten plus years of experience in leading of projects. This is a senior level role in a growing company!

Full benefits package including flexible work schedule, alternate commuting incentives, telecommuting options, PTO, and more.
