Job Number 1017171514

Wage Type Salary

Division Corporate Engineering

Job Title Manager, Electrical and Controls Engineering

Location Atlanta, GA

Job Description The Corporate Engineering Department is seeking a qualified candidate to fill the position of **Manager, Electrical and Controls Engineering** (Pay Grade 5). This position will report to Douglas Cook, Director of Corporate Engineering. The successful candidate will have a Bachelor's degree in electrical engineering or comparable work experience plus proven substantive electrical engineering expertise. PMP and PE credentials are a plus.

The successful candidate will have demonstrated knowledge of equipment controls programming and web handling.

Key responsibilities include:

- Managing the Corporate Electrical Engineering function, which includes:
 - Designing power distribution plans for manufacturing facilities to ensure optimization of power to the equipment and facility in general
 - Making recommendations and putting forth requirements to the general contractor or plant engineers on specification of electrical support equipment and lighting
 - Specifying electrical/electronic drives and plc's for production equipment
 - Providing technical service support to the manufacturing facilities with the purpose of optimizing performance and avoiding service costs
 - Developing techniques to improve all relative processes with the intent of reducing costs and maximizing performance of the operating equipment

- Developing technologies that will give Printpack a competitive advantage
- Interacting in a professional and consultative manner with various levels of Corporate and Facility Engineering; Business Development; and Divisional Operations
- Creating and managing the Electrical and Controls Engineering operating budget
- Managing and developing staff
- Developing electrical control standards for the corporation
- Be the electrical and Controls subject matter expert for the company.
